

The MarketVector™ Bitcoin Benchmark Rate is a robust reference price for Bitcoin in USD, based on one hour median weighted prices. The index methodology is designed with a focus on accuracy, reliability, and resilience against market manipulation. It has been licensed to underlie financial products with currently USD 1183.55 million in assets under management.

The chart displays the daily number of COVID-19 cases in the United Kingdom. The x-axis represents time, with labels for October, January, April, and July. The y-axis represents the number of cases, ranging from 20,000.00 to 80,000.00. The data shows a significant increase in cases starting in late 2019, peaking in late April at approximately 80,000 cases per day. The number of cases then fluctuates, with a second peak in late June and a third peak in late August, before declining in early September.

Volume weighted median price average, based on 20 3-minute intervals.
