

DESCRIPTION

The MV Emerging Markets Aggregate Bond Index (MVEMAG) tracks the performance of emerging markets sovereign bonds and corporate bonds denominated in USD, EUR or local currencies. The index is a unique 'one stop' index benchmark for emerging market debt because it is the first index that includes investment-grade and below investment-grade bonds of the four major categories of emerging markets bonds. Each of the four categories is also tracked separately by one of the four sub-indices derived from MVEMAG: MV EM Corporate Bond Index (USD&EUR), MV EM Corporate Bond Index (local FX), MV EM Sovereign Bond Index (USD&EUR) and MV EM Sovereign Bond Index (local FX). The indices are calculated as total return indices and are reviewed monthly.
