

Market Vectors Index Solutions Announces April Performance of Market Vectors Hedge Fund Beta Indices

Frankfurt (2 May 2013) – Market Vectors Index Solutions (MVIS) today announced the April performance for its six investable Market Vectors Hedge Fund Beta Indices. Each index is constructed using transparent, liquid ETFs to produce hedge fund-style returns without hedge fund pricing, opaqueness and redemption restrictions.

With a history stretching back to 2003, the Market Vectors Hedge Fund Beta Indices use a patented methodology in seeking to capture the beta returns of universes of statistically similar hedge funds that exhibit in aggregate consistently high concentrations of beta. MVIS currently offers four regional and two global long/short hedge fund strategies.

The table below shows the performance of the indices for April 2013 and for selected periods:

Index	Initial Date of Publication	Ticker	1-Month	3-Month	1-Year	Life (annualized)*
