

MARKET VECTORS INDEX SOLUTIONS ANNOUNCES JULY PERFORMANCE OF MARKET VECTORS LONG/SHORT EQUITY INDICES

Frankfurt (4 August 2014) – Market Vectors Index Solutions (MVIS) today announced the July performance for its six investable Long/Short Equity Indices. Each index is constructed using transparent, liquid ETFs to produce hedge fund-style returns without hedge fund pricing, opaqueness and redemption restrictions.

With a history stretching back to 2003, the Market Vectors Long/Short Equity Indices use a patented methodology in seeking to capture the beta returns of universes of statistically similar hedge funds that exhibit in aggregate consistently high concentrations of beta. MVIS currently offers four regional and two global long/short equity strategies.

The table below shows the performance of the indices for July 2014 and for selected periods:

Index	Initial Date of Publication	Ticker	1-Month	3-Month	1-Year	Life (annualized)*
