

MVIS® ANNOUNCES SEPTEMBER 2017 PERFORMANCE OF MVIS LONG/SHORT EQUITY INDICES

Frankfurt (2 October 2017) – MV Index Solutions (MVIS®) today announced the September performance of its seven investable Long/Short Equity Indices. Each index is constructed using transparent, liquid ETFs and US Treasury securities to produce hedge fund-style returns without hedge fund pricing, opaqueness and redemption restrictions.

The MVIS Long/Short Equity Indices use a patented methodology in seeking to capture the beta returns of universes of statistically similar hedge funds that exhibit in aggregate consistently high concentrations of beta. MVIS currently offers four regional and three global long/short equity strategies.

The table below shows the performance of the indices for September 2017 and for selected periods:
