

COIN50 Daily Summary

The COIN50 index experienced a daily return of -1.41%, with notable declines in major categories such as Decentralized Finance and Meme Coins. The 30-day and 90-day returns also followed a downward trend, highlighting the increased volatility in the market over these periods.

Key highlights:

1. **Top Performer:** The BTC token remained resilient, sealing the top spot with a minimal loss of -0.32%.
2. **Largest Decline:** The HNT token registered the largest decline at -10.36%, indicating a challenging day for token holders.
3. **Noteworthy Movements:** Despite the broader market challenges, certain tokens managed to limit their losses, with SNX and XRP losing only -0.48% and -0.81% respectively. This served to underscore the relative strength of these tokens in a challenging market. Overall, while the returns were largely negative, the market reflected varied performances across different categories and tokens.

Performance

Index and Sector Performance

Top 5 Tokens by Daily Return

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. MarketVector does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. MarketVector makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. MarketVector is not an investment advisor, and it makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document.

Investments into crypto currencies and/or digital assets are subject to material and high risk including the risk of total loss. The calculated prices may not be achieved by investors as the calculated price is based on prices from different trading platforms. Furthermore, an investment into crypto currencies and/or digital assets may become illiquid depending on the trading platform or investment product used for the specific investment. Investors should carefully review all risk factors disclosed by the relevant trading platform or in the product documents of relevant investment products.

Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other vehicle. Inclusion of a security within an index is not a recommendation by MarketVector to buy, sell, or hold such security, nor is it considered to be investment advice.

All information shown prior to the index launch date is simulated performance data created from backtesting ("Simulated past performance"). Simulated past performance is not actual but hypothetical performance based on the same or fundamentally the same methodology that was in effect when the index was launched. Simulated past performance may materially differ from the actual performance. Actual or simulated past performance is no guarantee for future results.
